## Experience

---

### VarsityLink

Remote

#### Software Engineer

July 2022 – April 2023

- Wrote APIs in **NodeJS** with a **Postgres** database and **Redis** cache to manage data for a sports focused social media application
- Added real-time chat functionality to a mobile application using **React Native**, **NodeJS**, and **GetStream**
- Developed pages to input and display user profiles and dynamic statistics for various sports in a **React NextJS** web application

### Automatic Data Processing Inc (ADP)

Parsippany, NJ

#### Senior Application Developer

March 2022 – June 2022

- Created a modern, accessible payroll dashboard utilizing **Typescript**, **React**, **Redux**, and **Tailwind** used by over 10,000 live clients and hundreds of thousands of their employees
- Built a **Batch Processing** service that allows importing payrolls from CSV files, provides business rule validations with meaningful logs, and supports file management through **AWS S3**

#### Application Developer

December 2019 – March 2022

- Wrote **RESTful APIs** with **Java**, **Spring Boot**, and **Hibernate** for a flagship global payroll solutions product that connects and unifies the payrolls of 100+ countries in one platform
- Mentored and performed code reviews for other team members

#### Associate Application Developer

November 2018 – December 2019

- Participated in different projects among more than 100 high performance, consistency and availability **Microservices** deployed on **AWS EC2**
- Built paginated grids and validated forms using **Typescript**, **React**, and **Redux** that allowed for the management of nearly 100 entities used across ADP products

## Education

---

**Fullstack Academy** – Software Engineering Program

May 2018 - August 2018

**Emory University** – Bachelor of Arts in Economics

August 2011 - May 2015

## Projects

---

### Baike

<https://baike-six.vercel.app/> | <https://github.com/jormarcus/baike>

- An app to find, organize, and share recipes
- Built with Typescript, React, NextJS13, Tailwind, Prisma, Postgres, AWS Lambda, Cloudinary, Vercel

## Skills

---

**Languages:** Javascript, Typescript, Java, SQL, HTML/CSS

**Frameworks, Libraries, & Databases:** React, React Native, NodeJS, NextJS, Redux, Tailwind, Prisma, Sequelize, Postgres, Oracle, MongoDB, AWS S3/Lambda, Redis, Kafka, Docker, Spring Boot, Hibernate
